Real Time Web Based Monitoring of Community Led Total Sanitation:

Village to Nation

Government of Kenya and UNICEF collaboration

Shiva Singh; WASH Specialist
UNICEF , Kenya

unite for
children

unicef

Background: Kenya Sanitation Programme

- Community Led Total Sanitation (CLTS) adopted as core strategy for attaining ODF Kenya

- CLTS adopted countrywide

- Sanitation subject devolved to 47 counties

- Kenya has developed a Roadmap to achieve ODF Rural Kenya by 2020

- UNICEF supported Ministry of Health to develop Real Time Monitoring System to monitor progress and improve accountability in programme implementation
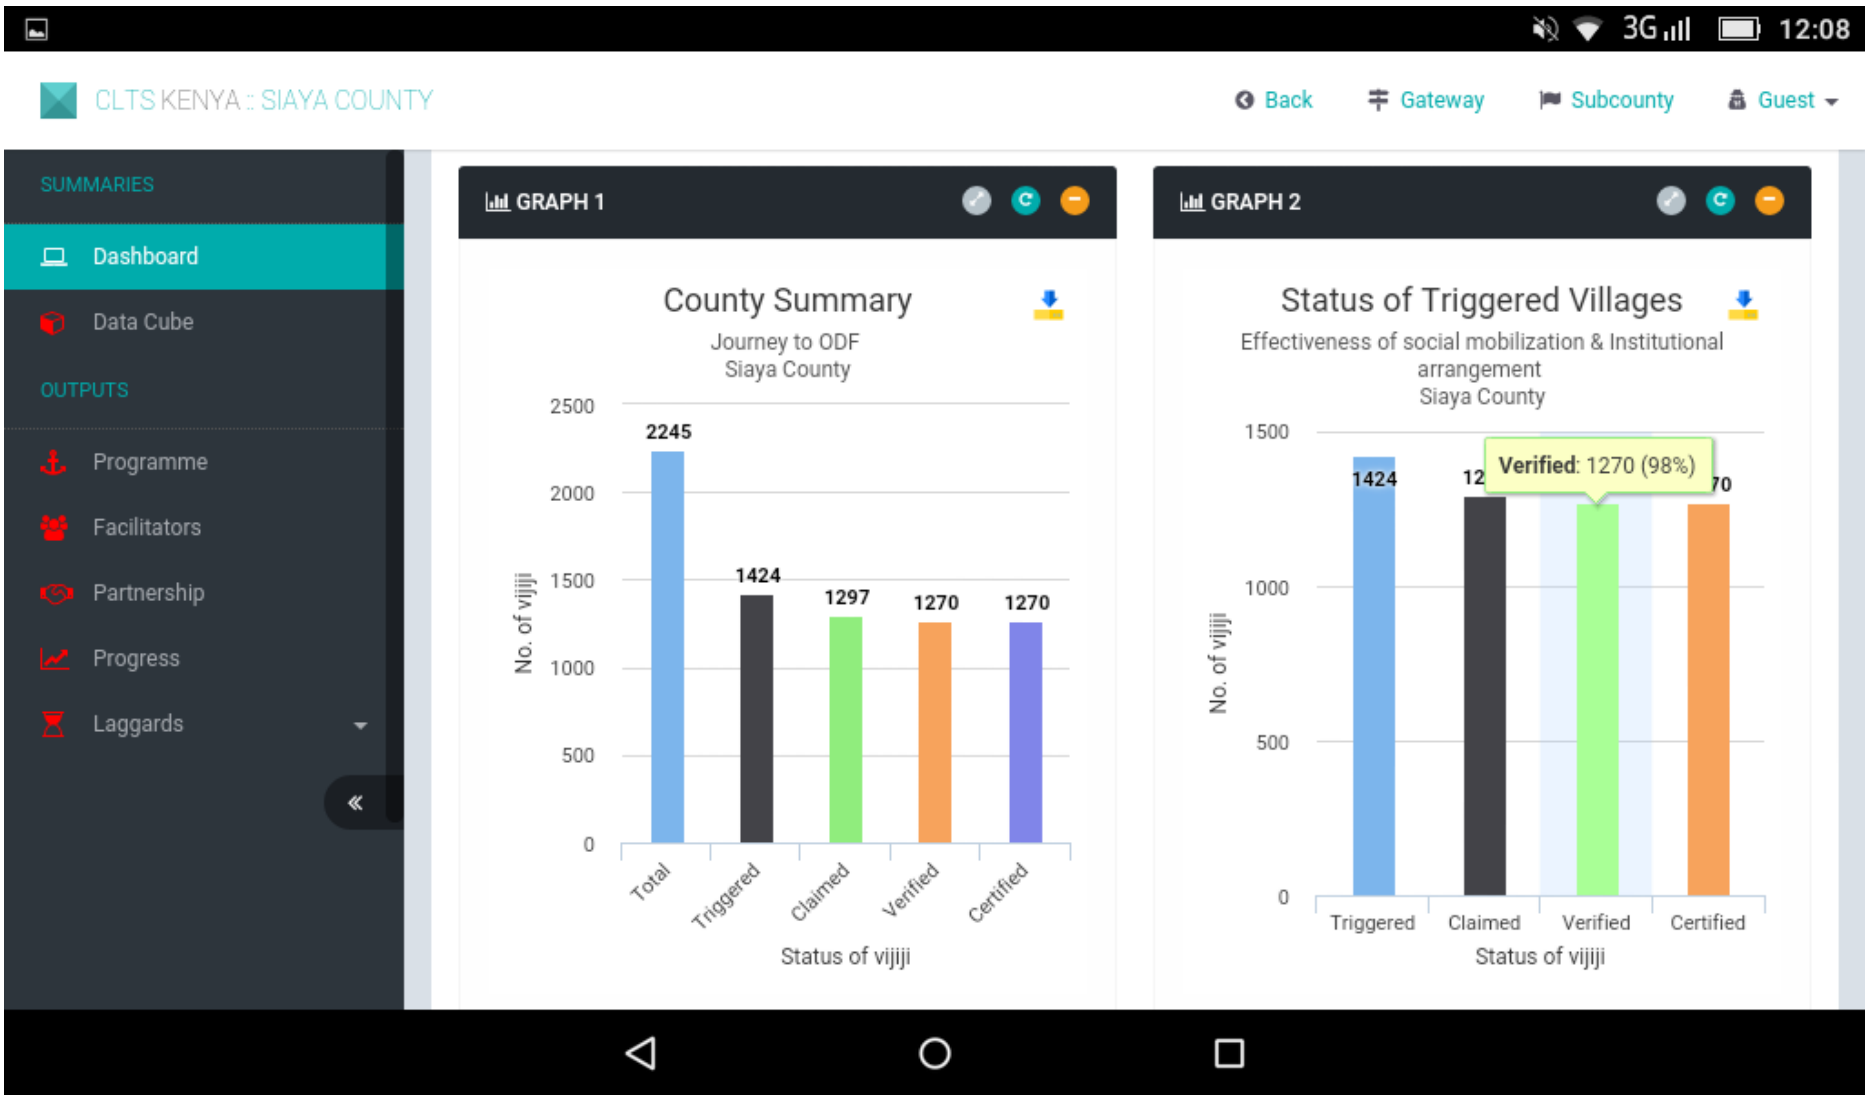

- A tool for
  - For monitoring progress

  - Provide info on key bottlenecks and quality of implementation

  - Bringing more transparency (accounting for contribution of partners up to village/community level and info available on a platform accessible to all)

  - <u>Ensuring accountability of partners supporting CLTS implementation</u>

  - <u>Answering attribution and contribution of UNICEF and partners in achieving ODF communities</u>

Experiences so far and way forward

- Improved accountability (Misreporting /duplicate reporting can be identified)

- Transparency in attribution of inputs

- Compliance to use of system if linked with financial progress/reporting

- Outputs shared at the County level stakeholder forums: naming and shaming;

- Planned to use at Country level quarterly Inter Agency Coordination committee meeting

Challenges/Pointers for adaptation

- Must be led and owned by the Government

- Designing a simple format few indicators. Do not be too ambitious

- Must have something for stakeholders at all levels

- The hardcopies; though minimal, important for accountability and authenticity

- Training of functionaries at all levels. Handholding

   for mastering the web based system
